WORK EXPERIENCE

Full Stack Developer

External Shield | Surat, Gujarat

June 2022 - September 2022

July 2023 - April 2024

- Worked part-time, gaining practical experience in developing web applications and blockchain solutions while balancing academic commitments.
- I enhanced my skills in React, Node.js, Next.js, Tailwind, Solidity, and audit tools like Slither through hands-on projects.
- We have acquired in-depth knowledge of blockchain technology and smart contract development by working on real-world projects using Solidity, Hardhat, and IPFS.
- Learned to manage time efficiently, balancing part-time work with academic responsibilities, ensuring timely delivery of project milestones.

Full Stack Developer (Internship)

CodeLabAcademy | Surat, India

June 2023 - July 2023

- I gained practical experience in full-stack development during a 15-day college-required internship, focusing on real-world application development.
- Developed the BookMyTable platform, a table reservation system that streamlines customer access to dining options and reduces waiting times, using the MERN stack (MongoDB, Express.js, React, Node.js).
- Enhanced my skills in front-end and back-end development, working with technologies such as React and Node.js to build robust and efficient applications.

PROJECTS

CryptoBacker

- Developing a crowdfunding platform that uses the Ethereum blockchain to ensure transparency and security. The platform integrates Uniswap to minimize price fluctuations and reduce the risk of fraud.

Smart Scan

[Reference](#)

- An advanced tool designed to ensure secure smart contract development. It provides automated and comprehensive analysis to identify vulnerabilities in Solidity code, enhancing smart contract security.

DeNFT

[Reference](#)

- A platform for NFTs that allows users to mine, buy, sell, fractionalize, and trade digital assets. The marketplace facilitates seamless transactions for buying, selling, borrowing, and lending NFTs.

External Shield

[Reference](#)

- A website designed to assist organizations with the audit process. It supports auditors and helps manage product audits efficiently, providing a comprehensive solution for audit needs.

Admit

[Reference](#)

- A platform that streamlines the college admissions process. It allows students to securely upload their data and documents, while colleges can manage payments, verify information, and process applications efficiently.

BookMyTable

- A table reservation platform that enables vendors to register their restaurants and allows customers to efficiently access dining options. Developed using the MERN stack, it aims to reduce waiting times and improve the dining experience.

CERTIFICATIONS

L2 Rollathon Winner – Gitcoin Hackathon

Develop Your Skills with the OpenAI API – LinkedIn Learning
