INTERNSHIP JOB DESCRIPTION

Title / Job Role: Full Stack Engineer (Intern)

Location: completely remote - work from wherever you would like to!

Timings: 9 am to 6 pm Indian Standard Time + availability for meetings as per US hours (subjective)

Budget: Up to INR 20,000 / month. **This internship has the potential of converting into a full - time employment having a budget of 6 to 9 LPA (the final offer will be decided based on performance during the period of your internship).**

What is in it for you?

- Completely remote working - whether you want to work from the mountains up North or the beaches of India, you are free to decide where you work from.

- Work with a high-energy young team! You will not feel any corporate or bureaucratic culture at Playpower Labs. On the contrary, you will work with an easygoing team that may even be your next social group!

- Experience the best of both - work with a team in India while closely working directly with clients in the US. This is a great opportunity to expand your network and your skills!

- Working desk and a MacBook Pro or anything equivalent (for full-time employees)

About Us

At Playpower Labs we provide **integrated software development services to solve challenging problems in the EdTech industry**. We have some of the best-in-the-business EdTech Companies as our clients that serve millions of learners. **Our goal is to help them deliver the best learner Experience through advanced technology.**

Our team has been remote since pre-COVID times and plans to remain so. We are a US-based Company with a development center in Gandhinagar, India.

One of our valued beliefs is that Technology will help provide engaging and effective education for millions of learners around the world. For us, technology is a force multiplier.

We are determined to have the future of education be supported by advanced online learning and we, backed by ample success in the EdTech Industry, will be right here to shape the future.

What would your day look like?

- Complete the tickets assigned to you on a timely basis.

- Closely collaborate with your team to increase overall team output.

- Closely collaborate with your team to take on responsibilities/assignments that would benefit the team's productivity and your professional growth.

- Project a keen eye for overall code quality with code scalability, maintainability, and readability in mind.
